Q5 What makes you recommend this course?

Answered: 7 Skipped: 0

#	RESPONSES	DATE
1	The lecturers and the content of the course	3/23/2026 2:21 PM
2	The exercises were really good to complement topics in the lectures.	3/22/2026 11:30 PM
3	I would highly recommend this course to anyone interested in learning Local Projection methods. The course provides a very clear introduction to the fundamentals while also covering practical implementation. What I particularly appreciated is how the instructors consistently connect the econometric framework to the broader research literature, which helps participants understand not only how the method works, but also how it is applied in empirical studies. Another strong aspect of the course is the hands-on component. Participants have the opportunity to implement Local Projections using MATLAB with real examples based on existing studies. This practical experience makes the concepts much easier to grasp and directly applicable to research projects. Overall, the course offers an excellent balance between theory, methodology, and empirical application.	3/16/2026 10:12 AM
4	The tutorials complemented the material covered in the lectures really well, and they made a great choice of examples/exercises	3/14/2026 11:44 AM
5	Very well thought out course by researchers in the frontier of the field.	3/13/2026 10:26 PM
6	Implementation of more programming languages	3/13/2026 7:01 PM
7	Clear presentation of applied tools, lots of examples, and usefully written code to support applications.	3/13/2026 6:47 PM
